

Walworth low-traffic neighbourhood

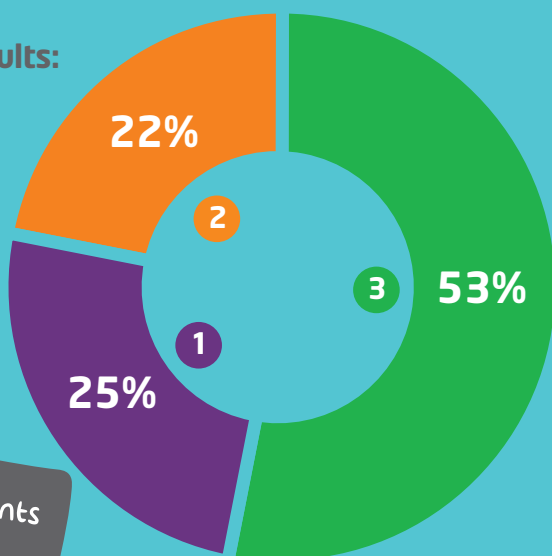

Alberta Street permeable road closure survey - what you told us

We asked you whether you would like to change the location of the permeable road closure on Alberta Street or keep the closure in its current location.

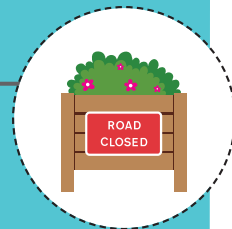

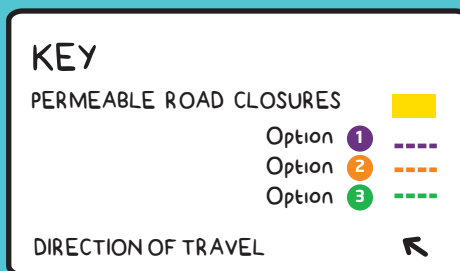

There were three options to choose from which provided different access arrangements, parking changes and impact on walking and cycling.

You told us that the majority of respondents to the survey preferred Option 3, this is to keep the permeable road closure in its current location on Alberta Street.

Survey results:

20% of residents responded

What is a permeable road closure?
A permeable road closure blocks motorised traffic but allows pedestrians and cyclists to filter through and uses street furniture such as planters or bollards to do this.

To see the final report on the survey's outcome and analysis you can find this at www.southwark.gov.uk/albertastreetltn
