ROAD
CLOSED

Overview

Camberwell Grove bridge, near the junction with McNeil Road, has been closed to motor traffic since October 2016, due to structural failure. Repairs to the bridge will soon be completed by Network Rail, which will allow it to be reopened for small motor vehicles (under 3 tonne) with traffic lights allowing alternate one-way flows to cater for both north and south-bound traffic.

Since the bridge has been closed, the council has heard from some residents who favour retaining the closure on a permanent basis, as well as some residents who wish to see it reopened as soon as possible, principally due to the impact of additional traffic on other residential roads in the area.

However because it will make such an impact, the council wants to hear your views before taking a final decision on reopening the bridge.

Monitoring of traffic displacements - what the results show.

As part of the closure the council monitored traffic volumes in the local area in order to evaluate impact of any traffic displacements.

Traffic data was collected in 2015, prior to the bridge closure.

The council collected traffic data in November 2016 and July 2017.

Summary of traffic analysis: See Figures 2 and 3

Generally there has been an increase in traffic on the following residential roads:

Grove Park / Chadwick Road / Lyndhurst Way
Bellenden Road / Lyndhurst Grove / Rye Lane

Volumes have reduced on:
Camberwell Grove / McNeil Road / Grove Hill Road

Generally a 15% increase in traffic volume in the area of influence compared to the 2015 baseline.
